

WATER AND POWER EMPLOYEES' RETIREMENT PLAN

Posted April 21, 2020

IMPORTANT REMINDER

LADWP is not offering a Separation Incentive Program, as you may have heard from other City Departments. It is important that you remember that the mortality tables are changing on July 1, 2020. To retire effective June 1, 2020 (prior to the tables changing), your application must be received by May 1. This includes those who have separated from Department employment and are eligible for a vested retirement allowance.

For those active employees eligible to retire, you are encouraged to review your retirement calculation by accessing the online calculator available on our website at <https://retirement.ladwp.com> (Department network access required). Using the calculator you can run estimates to compare the difference between your monthly allowance(s) for June 1, 2020 and July 1, 2020 to see if you are impacted.

The Retirement Office remains physically closed until further notice due to the COVID-19 event, but staff continues to work remotely to provide you with your benefits. If you are currently eligible to retire and concerned you may be impacted by the change in the mortality table this July, please email Retire@ladwp.com with your contact information and a staff member will reply within 24 hours. As an alternative, you may call (213) 367-1715 and leave a message with your contact information.
